- b. Which is the country having the highest youth employment population between 2004 through 2014? Paste the screen shot of the Youth Employment Population sheet below.

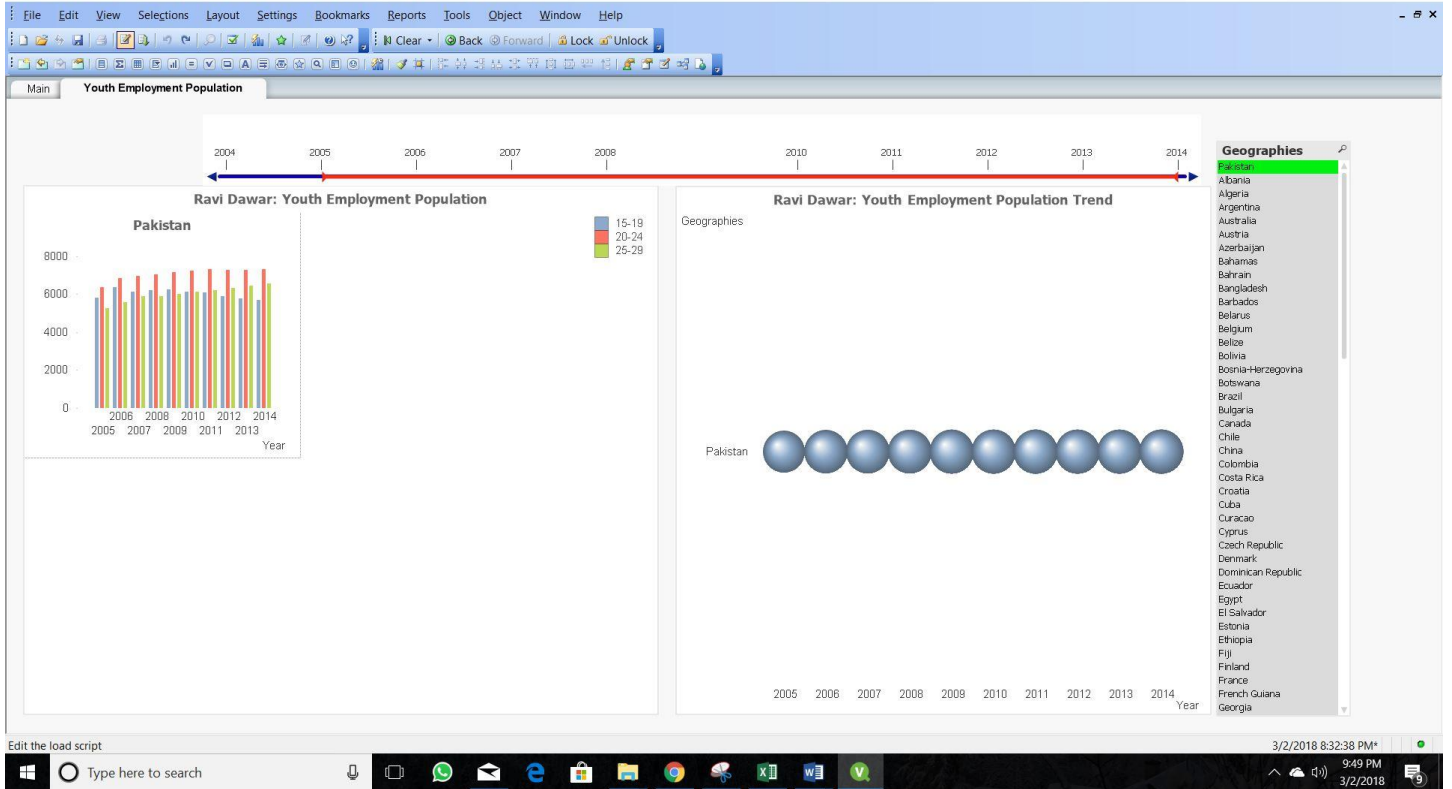

Answer CHINA

- c. What is the trend between different age groups (15-19, 20-24, 25-29) do you notice in most of the countries from 2005 to 2014? What does the trend for Pakistan look like between these age groups?

Answer

On observing we can say that most of the countries have an increasing trend between different age groups which is the average employed population increases with age. The age group of 25 to 29 has higher average than the age group of 20 to 24, which is further higher than the age group 15-19. Although there is an some disparity in the trend of Pakistan, where the average for the age group 20 to 24 is the highest followed by 25 to 29 and lastly 15 to 19 years age group
